

# A Learning Challenge – Heath Robinson Challenge

## Your challenge is to ...

Design a device for ridding a house of mice.

## Design ...

- Design a way of removing a mouse from a house and depositing it a safe distance away. Your device must not break the security of the house.

## Your resources ...

- You can use all the mechanical bits of the machine and other mechanical aids (nothing electrical or electronic).
- You have 20 minutes.
- One member of the group will act as an observer.

## Explain ...

- Make a drawing, diagram or description of your newly invented device explaining how it works.
